

Gem State Gardener

Garden Clubs of Idaho, Inc.

President's Message

I want to start out with “we made it!” Spring is here and a feeling of renewal is in the air. It has warmed up quickly this year, so I am getting a jump on my yard. As I am doing cleanup, I’m thinking of all the struggles we have overcome this last year. We lost two club presidents to cancer alone. I worked with and came to know them both.

I want to put a special shout out to the members that continued to meet, used Zoom or participated in so many ways that might have felt unnoticed. I’m proud of Garden Clubs of Idaho and all that we persevered and yet remained intact and together. Because being together is what it’s about. That was very evident during our SW District Meeting March 28th hosted by the Owyhee Gardeners GC this year. What an impressive display of creativity and teamwork that all came together to make a most enjoyable day.

I am receiving at least two emails a week by people new to Idaho asking where the closest club to them is located. I always direct them to our GCII.org website, and now with the added gallery that Karen Martin suggested we are going to be even more visible. Please send completed club project pictures to Lisa Artiga or me to have them posted on our webpage. We also have a calendar of events on our website where we need to post our upcoming meetings and contact numbers for newcomers.

I know we are all looking forward to our upcoming plant sales and club projects. I want to thank everyone that has been so helpful to me this last year and for all your hard work and ongoing dedication to Garden Clubs of Idaho.

State President, Karen Jean Lowe

Nezperce Garden Club

By Rosalea Figgins, President

In December we had a potluck Christmas Dinner at Marie Elven's country home. She had all the trimmings up for Christmas. The ham and rest of the food was delicious. A good time was had by all as we enjoyed a white elephant gift exchange and dessert.

In January we put together Valentine gifts for the craft fair that was scheduled for February 12th in Nezperce at the Eller Building. We made a lot of gifts that the young people could purchase for their moms that were affordable

On February 12th we displayed our Valentine crafts and also held our annual bake sale to raise funds for the scholarship fund. Despite many conflicting events going on that day we still raised \$347.00 for the fund. No wonder with the delicious baked goods the club members brought.

In March we went to the Rosalea's home and had corned beef and cabbage. Candace Starkweather who is heading up the improvements to the new park gave a talk on plans for the summer for it. First of all we had to rename the Park as the city has the Memorial Park. We decided on the Nezperce Garden Club Blue Star Commemorative Park. The club talked about roses in the park, an arbor with climbing clematis, hostas of different varieties under the trees and possibly Hollyhocks. Work will resume in late April.

A picnic bench is being built by the Nezperce School Shop Class. Here they are cutting metal for the picnic table frame which will hold a plaque honoring the family that donated the money to make this park update and restoration possible.

Valley Garden Club

By Stevie Westberg in cooperation with
Publicity Chairman, Linda Morrison

Here in the Clearwater Valley, our club has been very cautious in gathering for meetings as we have experienced the loss of one of our dear members, Pam Laird to Covid. Longtime member, Dana Keyser also passed suddenly, from natural causes. It gave us pause and we re-examined how we should proceed. We cancelled our winter meetings, gathering again in May for an outdoor program on planting herbs presented by Linda Morrison. In June, Nan Vance offered an excellent power point program on identifying native trees.

Here are club's highlights for 2021:

We held our annual plant sale in May at our new location in Kooskia City Park. It was a successful event which turned out to be an improvement over our original location in downtown Kooskia.

Our annual July luncheon took place in Orofino at "Dining on the Edge" along the Clearwater River. August meeting was our annual members fund raising auction.

Mason Bee chairman, Stevie Westberg had great success with the bees last spring pollinating Cortland Apple, Rainier Cherry, and Santa Rosa plum trees with an abundance of fruit to share.

Several of our members participate in the farmers markets here in the valley and one of them, Lynn Churchill, donates all proceeds to the club treasury so that we may help fund yearly scholarships and our local women's abuse center. The club also continues to support our local food banks along with the "Adopt A Highway" cleanup day, twice yearly.

We were grateful to be given a generous grant from National Garden Club for our "Plant America Community Project." We have created a "Welcome Flower Garden" coming into the City of Kamiah with perennials for pollinators along with annuals for additional summer color. We also installed an irrigation system along with a beautiful bench and arbor.

Dahlia

Valley Garden Club News, continued

A request was made for us to do some flower arrangements for an outdoor “celebration of life” for Jean Carroll, a longtime member who we lost in late 2020. It was a very special event put on by Jean’s daughter, Elna Otto. We were honored to be asked to do flowers.

Three of our members, Linda Morrison, Leann Wicks, and Lenette Smith planted a Flowering Crabapple tree in honor and remembrance of Master Flower Show Judge, Edith Cole, in her home town of Pomeroy.

Flower Show Judges Linda Morrison, Leann Wicks, Lenette Smith, and Joyce Parr pictured above.

Flowering Crabapple tree planted in remembrance of Master Flower Show Judge, Edith Cole.

From left to right Carol Entze and Bonnie Konrad Wilson of All Season’s Garden Club and Flower Show Judges Lenette Smith, Leann Wicks and Linda Morrison.

In December, for our Xmas bingo party, we gathered indoors. It was great to see so many members and catch up on news. These last two years have been quite a challenge for so many and we continue to work through it and stay healthy.

Southeast District

Merry Christmas and a Happy New Year to all our garden club friends throughout the state. This year really has flown by and it's hard to believe we will be writing 2022 on everything in just a couple of weeks.

The **Idaho Falls Garden Club** has stayed busy this fall. They met at Kay Rose's house in September to create some fun arrangements from flowers grown in their gardens. They took a break and had no meeting in October. Roberts Town and Country Garden Club was to have the district meeting, in October, but extenuating circumstances made it so there was no meeting. Stephanie Kelsey opened her home for their meeting in November to watch a PBS program titled "The Secret Life of Trees". Judy Dench narrated parts of the program which the club highly recommends for viewing. December found the club meeting at Janice Zabriskie's for a Christmas party. Special guests to the party were our state president Karen Lowe and her niece. A great time was had by all. Karen posted some pictures on the website if you want to see more pictures.

Roberts Town and Country Garden Club finally got their water feature put in at the corner of the city park. When the city finishes the sidewalks around the park, the club will landscape the area from the sidewalk to the fence going to the water feature on both sides and the water feature itself. The pots of flowers that were put out for the summer were cleaned out, picked up along with the planters and stored at the old high school to be used next year. Flower beds around the entrance stones were also cleaned and readied for winter.

The **Love of Growing Garden Club** in Twin Falls has one request that S.E. District would like to share with all clubs throughout the state. Debbie Burke, their president, has terminal cancer. She just got a packet of seed from Snake River Seeds. She would like to have a get-together in May, in her honor for a memorial planting at the Minidoka Wildlife Refuge, which has been near and dear to her heart. Please keep this in mind for one of your club's spring activities. More information will be sent out when it is available. She wants to thank all of you for your prayers.

Southwest District

Golden Garden Club By Pamela Lowe, President

We have a busy year scheduled!

We will be having our annual plant sale on April 29th and 30th.

Upcoming meetings will include a garden party, a tour of the MK Nature center, and a tour of Red Chair Lavender farms.

We most recently had a great meeting at Boise Watershed and had Advanced Master Gardener Rod Haars give a presentation on Insect Identification.

Here is a photo from our February meeting which was held at North End Organic Nursery (NEON). We had an excellent presentation on Houseplant Care by Greg Mattson.

Greg Mattson, NEON

Nampa Garden Club

By Sharon Viorel, President

Nampa Garden Club is very active in the Penny Pines program. At the beginning of the year, we had enough club member donations for another plantation. It was decided the plantation would be made in honor of club member JoAnn Schoonover for her hard work and dedication to the club. JoAnn is instrumental in the planning and execution of the Festival of Trees project. Thank you JoAnn!!

Planning is underway for the annual Plant and Yard Sale to be held on May 7, 2022. Members are busy starting and dividing plants. Many ladies are especially talented and we will have plenty of handmade crafts for sale at the event. These crafts were a big hit at last years' sale.

Charlene Hammons gave a presentation to the club about her trip to the Red Hills Desert Garden in St. George, Utah. This is a lovely botanical garden and Charlene's photos will no doubt encourage club members to plan a visit on their next vacation.

At our latest meeting, Diane Talsma, Certified Consulting Rosarian, gave a presentation about roses. Diane spoke about proper pruning and diseases that sometimes affect our roses. She is extremely knowledgeable and was well received by the club. She is an excellent resource for all things roses!

Nampa Garden Club had a wonderful time at the Spring District Meeting. Two of our members, Louisa Cone and Bonnie Winters, participated in the program. Louisa showed us how to make special, decorative garnishes in her presentation, "We Eat With Our Eyes". She demonstrated garnishes using ordinary food items such as oranges and tomatoes. Bonnie gave "Garden Hints" and showed us how to use very inexpensive, everyday items in our gardens. Most of the items were ordinary things that can be found at her favorite place....Dollar Store!

"Garden Hints"

Nampa Garden Club News, continued

At the District Meeting, we were honored by Garden Clubs of Idaho with awards for two of our programs. The first was for Civic Improvement for our care of the Veterans Garden at Nampa City Hall. Thank you Charlene Hammons for taking the lead on this project and keeping us on top of the garden. The second was for the Nampa Garden Club Facebook page. Special thanks to Jeanette Corso, the club's Facebook Administrator. She does a wonderful job ensuring pictures and event information are posted to the page.

Nampa Garden Club wishes to thank the Owyhee Gardeners for a wonderful, fun filled day. The planning and professionalism displayed at the Spring District Meeting was incredible.

Nampa Garden Club is busy planning the Fall District Meeting which will be held as follows.

“Enjoying Summer Harvest.....Garden to Table”

Monday, September 26, 2022

Valley Shepherd Nazarene Church in Meridian

Be sure to save the date!

We look forward to an enjoyable and productive summer!

GCI Committee News

ARBOR DAY

By Robyn McCarthy, Arboretums and Botanical Gardens Chair

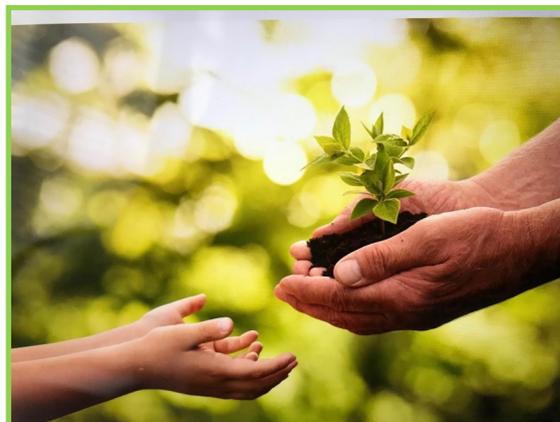

As pioneers from the eastern states began moving into the Nebraska Territory, they missed seeing their trees. Not only did they miss their trees, but they needed them for windbreaks to keep the soil in place, for fuel and building materials and for shade from the hot sun.

A newspaper editor and resident of Nebraska City, NE named Sterling Morton had a vision for trees and urged individuals and civic groups to plant them. When he became secretary of the Nebraska Territory, he spread the message of the value of trees. On January 4, 1872, Morton first proposed a tree planting holiday to be called “Arbor Day” at a meeting of the State Board of Agriculture.

A celebration date was set for April 10, 1872. Prizes were offered to counties and individuals for the largest number of properly planted trees on that day. It was estimated that more than 1 million trees were planted. In 1874 Arbor Day was officially proclaimed by Nebraska’s Governor, Robert W. Furnas, and in Nebraska April 22 was selected as the date for its permanent annual observance. By 1882 schoolchildren were planting trees on Arbor Day and learning of their importance. By 1920 more than 45 states and territories were celebrating Arbor Day.

Today the most common date for all 50 states to celebrate Arbor Day is the last Friday in April, but some states choose a date to coincide with the best tree planting weather. It can be a date from January and February in the south to May in the far north. This year Arbor Day in Idaho is celebrated Friday, April 29.

Membership

By Karen Martin, Chair

Recruit – Retention - Revitalization

National Garden Club is focusing time and resources to help local garden clubs. Membership Mondays are free to all garden club members. The meeting is held as a ZOOM event, second Monday of each month at 2:00 PM Eastern Time (Noon for most of Idaho and 11 am for northern Idaho.) Each month features a guest speaker to present a different topic. Topics focus on recruiting new members, retention of members and ways to revitalize clubs.

Haven't attended a Membership Monday meeting before and don't know what has been presented that could help your club – NGC has a library of videos of past Membership Monday meetings that you can watch at your convenience. Two future meetings are already scheduled for April and May that you can register to attend a live presentation.

Register to attend by simply going to the **gardenclub.org website**. Click on Member Resources, which is at the top of the page, and then Membership Mondays to register. Past presentations are available under the Member Resources Library. Click on the link to each video topic for recruiting, retention and revitalization.

National Garden Club has provided a lot of good information for all club members. Clubs should always be recruiting; clubs need to do what it takes to keep members happy and motivated. Take some time and cruise the National Garden Club website to see not only videos on membership, but also tools to help answer questions about social media and more.

The website has resources and helpful tidbits about Parliamentary Procedures available for Club Presidents. Check out Videos, More NGC Fun, and watch a video titled Christmas show, a tour of a garden club members home. Click on Flower Show Photography; see stunning photographs of flowers with commentary of the photo. Nation Garden Club website, a resource helping clubs learn and grow for the future.

Let's LEARN, GROW, CONNECT, AND SERVE as we PLANT AMERICA

Native Plants, Backyard Habitats & Pollinators

By Karen Martin, Co-Chair

Hardscape in the Garden

Hardscape gives structure, dimension and adds decoration to the landscape. The surfaces that we appreciate in the landscape can also be appreciated by pollinators.

Nooks and crannies in natural and manmade crevices, such as those in stone structures, rockwork, concrete and brick, provide places for nests, hideouts and shelter from the weather.

A landscape with structural elements provides pollinators more places to rest, warm up, or hide.

Dry-stack stone walls (stones laid without mortar) are especially good for burrowing insects and potential hibernation sites. Gaps and holes in wooden structures and fences are sites to hide and nest. Fence posts, trellises and other structural high points inside the garden are lookout spots for pollinators.

Native Plants, Backyard Habitats & Pollinators

By Karen Martin, Co-Chair continued

Providing stakes, branches or bamboo poles stuck in the ground amongst flowers can be a perch for butterflies and birds. The perch can be a home base to rest, a watchtower to spot danger or a place to see rivals approaching.

Butterflies use east and south-facing structures for basking. Walls, stepping stones or pavement provide a surface for butterflies to soak up the warmth. Rocks provide nesting and hiding places. Some pollinators hide underneath rocks for more moist

environments, while others appreciate the gaps between rocks. Adding rocks, boulders and flat stones to an existing perennial border enhances habitat. Survey your landscape and see how many elements you may have already, or think where you could add some elements that you and the pollinators could appreciate.

Youth Gardening

By Lorna Inglet, Co-Chair

Youth and gardening, it's a natural match and Spring is a great season to help both sprout! Gardens are a wonderful place to cultivate a meaningful and fun learning experience for youth. Gardening offers youth an opportunity to learn life processes of plants, insects, amphibians and fish as well as responsibility, caretaking and environmental awareness. Gardening will help grow youth's perception of where food comes from and hopefully help to develop healthy eating habits.

To help youth get excited about gardening, try to find gardening tools that fit their size. I was lucky to find sturdy, kid-size, gardening tools at the dollar store in bright primary colors and a basket to carry them in. Also, I couldn't resist the wind spinners which will not only add color but interest and fun. In the garden, let the youth know they have a small patch that belongs to them. A 3x3 foot area is a great starting point. In this area the youth can decide what will be grown and can experiment without having an impact on the larger garden. Make the garden fun by adding a pole-bean teepee or other small enclosure.

Youth enjoy plants that have strong smells, grow quickly and are easy to recognize. Larger seeds are easier for small hands to handle; sunflower, peas and pumpkins. Radishes and cherry tomatoes grow quickly and can be snacked on for instant gratification. The number one thing to remember is to **keep it FUN!**

Gardening can provide different forms of engagement for youth. Won't you engage with youth and share with them your knowledge and benefits you receive from gardening?

Reminder: **National Arbor Day is April 29** and my 22 year old Son is still very proud to share an apple off of HIS tree HE planted many years ago.

Hello all,

I will be your Regional Penny Pines Chairperson 2021-2023. I want to thank Regional Director Lana Finegold who appointed me to become the Pacific Region Penny Pines Chairperson and to Terry Critchlow for contacting and asking me to fill this responsibility. Penny Pines is a program of special interest since my early garden club days. I come from a family of Volunteer Firefighters and family who were professional Foresters. Dad was a volunteer firefighter in my small hometown of Keyser, West Virginia for 45 years and fought many brush fires and small fires in the forests. My twin was educated as a Forester and my Uncle was the Supervising Ranger of Forests for four Western Maryland counties. My son works at the National Interagency Fire Center and is a trained Hot Shot firefighter in addition to working as a program manager in the area of GIS and GPS.

After moving to Boise my husband and I had the opportunity to volunteer with Idaho Fish and Game. We helped plant seedlings by hand in burned areas and help to collect seed, mostly bitterbrush and sagebrush. This volunteer experience opened our eyes to just how tenuous our forests are. Fire, infestations, severe drought and climate change are wreaking havoc on our forests and are some of the areas to be address over the next two years.

All types of seeds collected provide the renewal of growth and are a necessary harvest. But what happens to these seeds after they are collected? Where do they go? Where are seedlings grown? Why is it important to ensure seedlings are returned to their native geographical habitat?

What are the other threats to our forests? What is being done to help address these threats? Does severe drought have effect on trees and can they recover? How many years of sustained drought does it take to have a devastating effect on our forests? Have we lost too many years of not managing climate change and can we recover from it now? What should we do and what can we do to help Mother Nature?

I will be contacting State Presidents, Treasurers and Penny Pines Chairs attempting to determine how many Penny Pines Plantations Pacific Region Garden Clubs have supported, please respond. As of September, 2021 there have been 45,510, an increase of 1000 since I began this article. Fires have consumed 5,609,865 acres and more than 18,795 men and women have worked these fires. The cost in 2020 a staggering \$2,274,000,000 and the cost of 2021 is not known. These stats came from the National Interagency Fire Center. As we know climate change it is only going to worsen

Garden clubs are known for flower arranging, beautiful public gardens and education. However, in 1997 NGC implemented the National Disaster Grant. Its purpose, is to replant parks, municipal gardens and other garden related sites due to natural disasters caused by floods, hurricanes, earthquakes, tornadoes, ice storms and wildfires. Grants of up \$5,000 per project may be awarded. Our mission statement and the Conservation pledge are the "word glue" that continues to be applicable today. We will continue to work toward civic and environmental responsibility and conserve the natural resources of the planet earth and promise to promote education so we may become caretakers of our air, water, forest, land, and wildlife."

Penny Pines December 2021

By Claudia Hambacker, Pacific Region Chair continued

Many thanks to Chris Schmidt, Account Assistant at National Garden Club headquarters, who was able to provide information of the total number of Plantations from the Pacific Region Garden Club from June 2020 to November 2021. There were 319 Plantations for a total contribution of \$21,592.00. Individual States are listed below from most to least.

State	Plantations	Monetary Amount
1. Oregon	183	\$12,444.00
2. Washington	54	\$ 3,672.00
3. California	52	\$ 3,536.00
4. Arizona	12	\$ 816.00
5. Nevada	10	\$ 680.00
6. Idaho	7	\$ 476.00
7. Alaska	1	\$ 68.00
8. Hawaii	0	\$ 00

It is important to note that Oregon gave many honorarium and memorial plantations. This is an excellent way to increase your State’s numbers and something other States may wish to consider. An Honorarium thank you to speakers at State or District meetings is an excellent way to provide lasting recognition of the speaker’s presentation or an individual who has worked especially hard on a project or someone who has given generously of their time, talents, or contribution. In January of 2023 the numbers from January 2022 through December 2022 will be reviewed and posted. We will then be able to keep an accurate year to year accounting for States and the Pacific Region Garden Club.

In the previous article I began to ask questions about the Penny Pines program and why it is important for each and every club to participate. This is a short historical summary. In the 1930’s a Forest Service Employee, Margret March-Mount, came up with the idea of “simple funding”. A method that would encourage clubs and children’s organizations to participate in replanting forests. In 1939 the Daughters of the American Revolution (DAR) decided to promote the program as a part of its 50th Golden Jubilee Anniversary and in 1941 it became a statewide conservation program in California. National Garden Club partnered with the Forest Service in 2004 and the NGC Penny Pines program was born. Today approximately 200 seedlings can be planted with each contribution of \$68.00. The Pacific Region Garden Clubs helped to plant 63,800 seedlings at a cost of about \$3.00 each. A recent article in Nature Conservancy estimated that 3 billion trees will need to be planted each year to reforest 64 million acres in the United States in order to contain the carbon dioxide produced in 2040. Currently the United State Forest Service produces and plants 1.3 billion. So we need to at least double our numbers.

See my next article in the August edition of the Gem State Gardener entitled “Precious Seeds”.

Why we should be part of National!

I invite each garden club member to refer to the National Garden Club website at <http://garden.org/> It's filled with valuable information about NGC.

The Member Resources section is where the **Video Café** is located.
The recording of the Leadership workshop held in March is in the café.
Questions that are sometimes asked are highlighted below with responses.

Why should you join a garden club?

For assistance in achieving your goals, camaraderie, and especially to have fun.
An opportunity for clubs, states, and NGC to work together to be a force for good.

Why should a club or state be a member of the National Garden Clubs, Inc?

You will be joining a large organization that can provide a vast array of opportunities.

Personal Growth: through continuing education with NGC's various schools and webinars.

Leadership development: NGC assists and encourages members to accept new responsibilities and develop new skills such as conducting efficient and meaningful meetings, parliamentary procedures, financial, organizational, project development, and other skills.

Recognition: everyone needs a pat on their back for jobs well done. NGC celebrates members' achievements with awards and recognition.

Blue Star/Gold Star Markers: to honor our military who help keep us safe.

Community service: NGC members are caretakers, gardeners, and responsible stewards conserving, preserving, and protecting our valuable resources, Mother Earth.

Travel opportunities: Tours are scheduled yearly and may be in the United States or in foreign countries.

Technology: Closing the divide in communication through Zoom, Canva, and other mediums with assistance to local clubs and members through NGC Media Committee.

Marketing: Getting the word out! Marketing through NGC's social media, the NGC Website, and The National Gardener. You may also receive helpful tips in creating your own social media platforms.

Youth Programs and Awards: NGC is helping the next generation of gardeners grow and succeed with youth gardens, youth clubs and youth books.

Celebrity Exposure: Meeting and hearing from fascinating and knowledgeable members of the gardening community such as P. Allen Smith, Doug Tallamy, Kirk Brown, and other speakers through NGC webinars and in-person meetings.

A free subscription to The National Gardener and a free subscription to the NGC Blog can be sent directly to your inbox. No Charge!

NGC provides value for the one dollar (\$1.00) membership fee.

Compare this to the monetary offerings from NGC....

- Plant America Grant up to \$1000
- Ames Tools Grant up to \$250
- Espoma Grant up to \$250
- Wildflower Education Grants up to \$500
- Natural Disaster Grant Funds up to \$5,000
- Youth Pollinator Garden Grant \$200
- College Scholarships \$4,000 per scholarship

National Garden Clubs can provide help and support, and together we can make a collective impact on our environment.
